

January 2012

Endorsement of professional services Innovation Professional Services LLP (Innovation)

We were pleased to work with the people at Innovation to optimise the arrangements on the use of fuel cards in our business.

Innovation brought a good mix of creative thinking along with good practical implementation skills. They have the right kind of experience "having been there and done it before" and weren't afraid to get into the details on implementation and support.

Based on our experience on fuel cards, I'd be very happy to endorse working with Innovation on similar projects. We found them to be straight talking individuals, and delivered on time and to budget, and now I can only question why we took so long to give it the go-ahead.

Regards,

John Hamilton
Group Taxation Director
Group Director of Pensions and Employee Benefits
