Listening... Responding... Delivering

To Whom it may concern

Innovation Professional Services Ltd

We have been working with a specialist firm of fleet advisers, called Innovation, for a few years.

Innovation brought us a new cost saving solution which has benefited us and our staff and driven savings in line with their forecasted expectations.

We have found Innovation to be particularly knowledgeable in this area compared to others as well as highly professional.

The team, from Newport Gwent, come over to see us when required in Spalding to make sure everything is running fine and to keep us up to date with new initiatives or developments, particularly in the tax world.

What makes the whole process work so smoothly and efficiently is their on-line mileage capture system and associated apps.

We have achieved a 100% compliance every month from day 1. All the drivers submit their monthly mileage logs on time. Innovation check every single journey for compliance and train / educate drivers where appropriate.

We also have a comprehensive suite of reports we can download ourselves from the system, which is really intuitive and easy to use.

Innovation have also produced a range of mobile phone apps which makes recording mileage really simple and accurate.

We would be pleased to endorse Innovation and recommend them to others and particularly suggest others at least look at their on-line mileage system if they were looking for a new approach to tracking business and private miles.

Kind regards

David Lowe
Head of Procurement
